

MIMS ASTER DM HEALTH CARE

Announces Three year Postgraduate
Comprehensive

Masters Program in Emergency Medicine (MEM)

Affiliated to George Washington University,
Washington DC, USA

Since 2007

MIMS
INSTITUTE OF
EMERGENCY MEDICINE

Dear Friends,

Malabar Institute of Medical Sciences proudly announces the Post Graduate Masters Program in Emergency Medicine (MEM) which will be conducted under direct guidance of Ronald Regan Institute of Emergency Medicine (RRIEM) of they are dedicated to saving life by improving Emergency Care in United States and across the world. We are committed to bring the widely acclaimed standards set by RRIEM to India.

We welcome physicians of the country who enjoy the real challenge of Emergency Medicine to join us.

Executive Director

Malabar Institute of Medical Sciences Ltd

The Malabar Institute of Medical Sciences Ltd (MIMS) is the first NABH accredited multispecialty hospital in India. This 600 bedded hospital is situated in the heart of Calicut city and has an atmosphere of quiet and unpolluted air. The hospital is renowned for its excellent medical expertise, nursing care and quality of diagnostic services and has been recognized leader in providing world-class healthcare services to the common man at an affordable cost. MIMS is continuously in tune with the latest technology that promotes the healthcare and well being of the patient.

The hospital has over 40 disciplines managed by highly qualified and trained full time medical specialists providing round the clock service.

MIMS is equipped with state-of-the-art medical equipment such as Helical CT Scanner, MRI Scan, DSA facility and nuclear imaging. One of the key features of the radiology department is that this is the only center in Malabar to undertake Interventional Radiology procedures. In the last three years, MIMS has been recognized as one of the best tertiary care hospitals in Malabar, and has also been identified as a leader in patient care, medical research and teaching. Today MIMS is known for its excellent faculty and staff who have specialized in every aspect of medical care. The hospital has grown into a completely self-contained unit with most of the sophisticated equipment available in the world to give quality care to the people of the Nation. The hospital has over 1200 employees including doctors, nurses, paramedical and administrative staff. Through out the period of its operation the hospital had intense demand for Emergency and Trauma care services. The clinical and medical programmes are continuously updated to meet both the changing needs of the community and challenges posed by new discoveries in technology.

MIMS has excellent facilities for providing emergency and trauma care for various emergencies like heart attack, stroke, Road Traffic Accidents, snake bites, burn injuries, internal bleeding etc. The department of Emergency Medicine is supported by 24 hours diagnostic department and a blood bank which has component separation facility. In Malabar, MIMS is the only hospital to have the D level Ambulance advanced cardiac and trauma life support facility for transporting the critically ill patients.

THE RONALD REAGAN INSTITUTE OF EMERGENCY MEDICINE

The Ronald Reagan Institute of Emergency Medicine at the George Washington University Medical Center was established in 1991, in recognition of both the undisputed excellence of the Medical Center's department of emergency medicine and its role in saving the life of President Reagan after a 1981 assassination attempt. The Reagan Institute serves to strengthen the health and welfare of local, national and international communities through research, education, training, and consultative support. The objectives of the Reagan institute are successfully achieved through initiatives related to injury prevention and control, the medical aspects of disaster planning, preparedness and response, and the enhancement of emergency medicine throughout the world.

The center for injury prevention and control

The center for injury prevention and control of the Ronald Reagan Institute of Emergency Medicine is dedicated to the reduction of death and disability from intentional and unintentional injury. The mission of the center is to develop multidisciplinary intervention, surveillance, and evaluation programs in order to focus greater attention and resources to fight injury in much the same way we fight cancer, heart disease and AIDS. The center achieves its goals through a unique collaboration of medicine, public health, sociology, and public policy within a program of research and education.

Disaster Medicine Service

The Ronald Reagan Institute of Emergency Medicine's Disaster Medicine Service is a consultation and training resource to national and international organizations responsible for disaster planning, preparedness, and response. Faculty members from the Reagan Institute are actively involved in medical training programs for federal Emergency Management agency (FEMA), National Disaster medical system (NDMS), office of foreign disaster assistance (OFDA) and the united nations relief organization.

The George Washington University Emergency Health Services Program serves as a resource to the national and international EMS communities emergency health care since the 1987. EHS is an essential component at the George Washington University School of Medicine and Health Sciences nationally recognized for its involvement in advanced health professions education, patient care, research, and community service.

EMERGENCY MEDICINE (EM)

Emergency Medicine (EM) is a relatively new specialty within medicine that is expanding at a phenomenal pace throughout the globe. Within the international community, leaders in medicine, health economics public health and government have recognized the need to develop a system that responds to acute medical and surgical emergencies. Emergency medicine is a unique discipline and an independent specialty with a body of knowledge and skills to care for training programs are available at a limited number of institutions, but an enormous need still exists to train many more emergency physicians to meet the nation's large demand for emergency healthcare providers.

The Malabar Institute of Medical Sciences (MIMS) has recognized the need to train highly skilled physicians to treat patients presenting with acute medical conditions. The Ronald Reagan Institute of Emergency Medicine (RRIEM) at the George Washington University (USA) have partnered together to collaborate with the medical faculty at MIMS to launch a Comprehensive 3 year Post Graduate Masters Program in Emergency Medicine. The program will train 20 students per year, and prepare them to practice in the complex and challenging arena of emergency medicine at the highest level.

Through an on going presence of faculty from RRIEM at MIMS, the students will have continuous guidance and education in the specific topics and skills that constitute the field of emergency medicine. The faculty will provide lectures, seminars, simulations, and clinical teaching to the trainees. The quality of the education program will be maintained through continuous assessment of the training faculty and the overall masters program.

MIMS ACADEMY

MIMS Academy is the educational wing of Malabar Institute Of Medical Sciences Ltd. It is headed by Prof. (Dr.) Karthikeya Varma former Principal, Calicut Medical College. The Academy conducts Dip.NB in Anesthesia, Cardiology, Cardio Thoracic Vascular Surgery, ENT, General Medicine, Family Medicine, General Surgery, Pediatrics, Radiology and Obstetrics & Gynecology as well as Govt.Approved BSc Nursing, General Nursing & Midwifery Courses, DMLT Course and various Para-medical courses. The Academy is also launching job oriented administrative courses in nine disciplines. Another project of the MIMS Academy is an entrance training program designed to provide guidance to the aspiring Medical Graduates who intend to appear for the Entrance examination for Post Graduate courses. MIMS school of Resuscitation under MIMS Academy is a recognized international training organization (RTO) of American Heart Association (AHA) for Basic Life Support (BLS), Advanced Cardiac Life Support (ACLS), Paediatric Advanced Life Support (PALS) and Emergency Cardiac Care (ECC) provider courses. The Academy is launching the

prestigious international training program in emergency Medicine MEM affiliated to GWU, USA.

www.mimsacademy.org

MCI

Medical Council of India (MCI) recognized emergency medicine as primary specialty on 21st July 2009. It is a great step in the history of Emergency Medicine In India.

THE SPECIALITY -WORLD PROSPECTUS

Emergency Medicine (EM) continues to grow internationally in scope and activity and serves an essential role as the safety net for patients in many countries. In recent years, urbanization, aging, economic changes and worsening health care problems have led to an increased awareness and need for emergency care throughout the world. EM has become more important due to its ability to meet not only the day-to-day treatment needs, but also to provide planning and leadership for disaster preparedness. There are now more than 30 countries that have recognized EM as a specialty and many of those countries where it is not yet recognized, are pursuing such specialty recognition and developing residency training programs. Many of the countries that are in the early stages of developing the specialty and their residency programs are reaching out for guidance from those countries that have been successful.

CURRICULUM IMPLEMENTATION

One of the essential components of an effective academic training program is a solid curriculum plan that provides the faculty and the residents with the specific criteria for theoretical and clinical education. At the international level, The 2003 Model of the Clinical practice of Emergency Medicine: A 2 year update can serve as a valuable resource for any country that is implementing an EM training program, and it has already been used to help structure residency programs in multiple countries such as Turkey, Korea, Singapore, Jordan, Saudi Arabia, Poland and Iran. The model has also been translated into Spanish, and academic institutions in Latin America have been able to use the translated model to integrate EM training programs alongside traditional training programs such as surgery and internal medicine by sharing the translated document with colleagues from other specialties.

Specialty societies such as the American College of Emergency Physicians, American Academy of Emergency Medicine, and SAEM could support EM-oriented distance learning projects.

INTERNATIONAL EM MASTERS

Masters programs in EM allow EPs to learn a special aspect of the field in more depth or to qualify for a certificate of added qualification (subspecialty certificate)

International EM Masters can offer unique opportunities in both education and research. Specific educational opportunities include international clinical and administrative experiences for EM residents, Fellows and faculty.

The American College of Emergency Physicians, American Academy of Emergency Medicine and SAEM potentially could collaborate with the Council of Emergency Medicine Residency Directors, international EM masters programs, and other stakeholders to develop standards for international EM fellowship curriculum.

POST-GRADUATE MASTERS PROGRAM IN EMERGENCY MEDICINE (MEM)

The post-graduate masters program in emergency medicine at MIMS will consist of a three year curriculum that will be divided into 36 clinical modules and cover the breadth of emergency medicine. RRIEM and MIMS will provide faculty coverage and program supervision for the masters program. At the successful conclusion of the program, the graduating doctors will be able to practice independently within emergency department as well-trained physicians, and they will receive a "Certificate of Completion" from the RRIEM at George Washington University -Washington DC, USA

The Course is recognised in more than 30 countries worldwide. The programme is not recognised by IMC.
Placement opportunity: The course offers excellent placement opportunity in India and abroad

Memorable Moments

ADMISSION

1. How to apply –

Apply online / email

30 seats per year (MIMS, Calicut, MIMS, Kottakkal, Aster Medcity, Ernakulam, DM WIMS, Wayanad, Aster CMI Bangalore)

Web site www.emergencymedicinemims.com , www.mimsacademy.org

Registration fee Rs.1500/- in favor of MIMS academy trust payable at Calicut

2. Selection strictly based on merit. Candidates should undergo written, aptitude and attitude test. Model Question paper can be downloaded from www.emergencymedicinemims.com/downloads

Preferential score will be awarded for

- Performance in under graduation
- State, National and International CME's attended
- International Life support courses attended
- Research/ Publications
- ED work experiences
- Written test score
- Interview score

3. Preferred books to read for written test

- a. Tintinalli Hand Book for Emergency medicine
- b. Oxford Hand Book for Emergency Medicine
- c. Revision notes MCEM Part A
- d. Secrets of Emergency Medicine

4. All graduated residents were well placed in India and abroad

5. Last Date for the Submission of Application 15th March 2016, at 5pm

6. Interview on 23rd March 2016

Students will spend $\frac{3}{4}$ of the program in the Emergency Medicine Department and $\frac{1}{4}$ of the program in other Critical Care *services. The rotation in the other departments will provide the students with opportunities to develop knowledge and skills in core subject.

ELIGIBILITY

MBBS with Completion of Internship BLS, ACLS, ATLS, ITLS and PALS structured courses and desirable.

Additional qualifications and work experience in emergency department are also desirable. Selection based on written aptitude test and interview.

OBSERVERSHIP in RRIEM

Students can do observer ship for four weeks at George Washington University Hospital working with the faculty in Washington, D.C. as an elective rotation. The students will be responsible for their airfare, housing and meals during the elective rotation.

*Intensive Care Unit, Cardiac Care Unit & Cardiology, Surgery & Anesthesia, Internal Medicine, Obstetrics & Gynecology, Pediatrics

Three year Postgraduate Masters in Emergency Medicine (MEM) under George Washington University Washington DC- USA

Course Highlights

- Mastery, Proficiency, Familiarity
- Three-year residency program
- Lectures on the modular topic of the month
- Evidence – based medicine
- Journal article discussions
- Online Log book – Maintained by GWU
- Grand rounds and guest speakers
- Morbidity and Mortality (M&M) conferences
- Follow up case discussions on patients admitted through the emergency department
- Procedures and skills Workshop
- BLS, ACLS, ITLS, PALS, NALS, ATLS Certification
- FAST and emergency Ultrasound training
- P.O.C. Echo Training
- Rotation in MICU, CICU, NICU, PICU
- Rotation at GWU (RRIEM) Washington
- Research and Publication
- Faculty Development Program
- Presentation by the Fellows
- Pre hospital care medicine
- Disaster Management
- Attractive stipend

- MCEM Training Opportunity
- Vast hands on experience
- Well Experienced Faculty
- Protocol based clinical practice
- Excellent placement opportunity

All successful candidates have been well placed with attractive offers

ED-7-8 months

The daily classes will be conducted by GWU faculty and Emergency Faculty from MIMS. After each module an exam will be conducted at the end of the month. Fellows will be given a project every month, which they have to finish before the next visit of the GWU faculties. Extra support and coaching will be given to the candidates who are finding it difficult to follow the course modules.

Evaluation

Each module will begin with a pre-test to gauge the fellows' academic knowledge on the clinical topics, and each module will end with a post-test to measure the fellow's level of comprehension and mastery of the material given during the module session. In addition to that, faculty will conduct an annual written and oral exam that covers the 12 modules within that year. The senior members of the Society for Emergency Medicine in India (SEMI) will be invited to participate as examiners. In addition, a final exam covering all 36 modules will be given at the end of the masters program.

How to apply: Duly filled application form should reach MIMS academy office or send scanned copies through mail id: (academy@mimsindia.com)
