Aster DM Healthcare

Aster DM Healthcare covers the full spectrum of healthcare services, taking healthcare to the next level of excellence. Being a growing network across the Middle East and India, it has an expansive portfolio that includes hospitals, clinics and retail pharmacies. From a single medical centre to a performance-driven healthcare enterprise spread across 280 establishments in 9 countries and growing, Aster DM Healthcare has transitioned into being a growing network across the Middle East and India. Currently one of the largest and fastest growing conglomerates in the MENA region, Aster DM Healthcare covers the full spectrum of healthcare services. An expansive portfolio includes hospitals, clinics and retail pharmacies. Headquartered in Dubai, the Aster DM network now encompasses 13,477 employees, 1003 doctors with several JCI accredited clinics and diagnostic centres. Never content to rest on its laurels, Aster DM Healthcare is constantly seeking opportunities to set new yardsticks with advanced developments. A move towards this unique vision is the Aster Medcity. Each of the group's verticals is a symbol of distinction, driven by the commitment to build a healthier tomorrow and to take healthcare to the next level of excellence.

The Ronald Reagan Institute of Emergency Medicine

The Ronald Reagan Institute of Emergency Medicine at the George Washington University Medical Centre was established in 1991, in recognition of both the undisputed excellence of the Medical Center's Department of Emergency Medicine and its role in saving the life of President Reagan after an assassination attempt in the year 1981. The Reagan Institute serves to strengthen the health and welfare of local, national and international communities through research, education, training and consultative support. The objectives of the Reagan Institute are successfully achieved through initiatives related to injury prevention and control, the medical aspects of disaster planning, preparedness and response, and the enhancement of Emergency Medicine throughout the world.

The Center for Injury Prevention and Control

The Center for Injury Prevention and Control of the Ronald Reagan Institute of Emergency Medicine is dedicated to the reduction of death and disability from intentional and unintentional injury. The mission of the center is to develop multidisciplinary intervention, surveillance, and evaluation programs in order to focus greater attention and resources to fight injury in much the same way

we fight cancer, heart disease and AIDS. The center achieves its goals through a unique collaboration of medicine, public health, sociology, and public policy within a program of research and education.

Disaster Medicine Service

The Ronald Reagan Institute of Emergency Medicine's Disaster Medicine Service is a consultation and training resource to national and international organizations responsible for disaster planning preparedness, and response. Faculty members from the Ronald Reagan Institute are actively involved in medical training programs for Federal Emergency Management Agency (FEMA), National Disaster Medical System (NDMS), Office of Foreign Disaster Assistance (OFDA) and the United Nations relief organization. The George Washington University Emergency Health Services Program serves as a resource to the national and international EMS communities emergency healthcare since the 1987. EHS is an essential component at the George Washington University School of Medicine and Health Sciences nationally recognized for its involvement in advanced health professions education, patient care, research, and community service.

Emergency Medicine

Emergency Medicine (EM) is a relatively new specialty within medicine that is expanding at a phenomenal pace throughout the globe. Within the international community, leaders in medicine, health economics, public health and government have recognized the need to develop a system that responds to acute medical and surgical emergencies. Emergency Medicine is unique in discipline and an independent specialty with a body of knowledge and skills to care for training programs are available at a limited number of institutions, but an enormous need still exists to train many more emergency physicians to meet the nation's large demand for emergency healthcare providers. The MEM program at Aster MIMS, Calicut had its beginning in 2007, subsequently similar programs were started at Aster MIMS, Kottakkal, DM WIMS Wayanad, Aster Medcity, Cochin and Aster CMI, Bangalore to meet the growing demand. All these institutions are certified with NABH Excellence in Emergency Medicine. Aster DM Healthcare has recognized the need to train

highly skilled physicians to treat patients presenting with acute medical conditions. The Ronald Reagan Institute of Emergency Medicine (RRIEM) at the George Washington University (USA) have partnered together to collaborate with the medical faculty at Aster DM Healthcare to launch a comprehensive three year Post Graduate Masters Program in Emergency Medicine. The program will train 30 students per year, and prepare them to practice in the complex and challenging arena of emergency medicine at the highest level. Through an on going presence of faculty from RRIEM at Aster DM Healthcare, the students will have continuous guidance and education in the specific topics and skills that constitute the field of emergency medicine. The faculty will provide lecturers, seminars simulations, and clinical teaching to the trainees. The quality of the education program will be maintained through continuous assessment of the training faculty and the overall masters program.

Medical Council of India (MCI)

recognised Emergency Medicine as primary specialty on 21st July 2009. It is a great step in the history of Emergency Medicine in India.

DM Academy

DM academy is a private coeducational, multi-institutional academy located in the Wayanad District, Kerala, that specializes in professional medical education. The institution was established by Dr Azad Moopen, a well known philanthropist and entrepreneur Dr Moopen's Academy is envisioned to be a Deemed University and a center for higher medical education and research. All other centres mainly DM WIMS Medical College hospital, Aster Medcity, Cochin and Aster CMI, Bangalore comes under the roof of Dr Moopen's Academy. DM WIMS Medical College hospital, Wayanad was established in 2010 on 50 acres of land at Naseera Nagar, Meppadi. It has clinical departments with super specialties like interventional Cardiology, Gastroenterology, Nephrology, Urology, Neurosurgery, Plastic Surgery and Pediatric Surgery, round the clock emergency services, dialysis service, blood bank services with component separation and storage facility, laboratories, Library, Hostels, museum and administration office. DM WIMS Hospital is the second in Kerala and the first teaching hospital in rural India to be accredited by National Accreditation Board for Hospitals and Healthcare Providers (NABH). The hospital is empaneled with many schemes run by the Government such as RSBY, Karunya Benevolent Fund, ECHS etc. and have entered into MOU for free treatment of tribal women. Institution has been supporting the Government in providing care to epidemic Kyasanur Forest Disease.

website: www.dmwims.com

MIMS Academy

MIMS Academy is the educational wing of Malabar Institute of Medical Sciences Ltd. It is headed by Prof. (Dr.) Karthikeya Varma, Former Principal, Calicut Medical College. The Academy conducts Dip. NB in Anesthesia, Cardiology, Cardiothoracic & Vascular Surgery, ENT, General Medicine, Family Medicine, General Surgery, Pediatrics, Radiology and Obstetrics and Gynecology as well as government approved B.Sc. Nursing, General Nursing & Midwifery Courses, DMLT Course and various Para-medical Courses. The Academy is also launching job oriented administrative courses in nine disciplines. Another project of the MIMS Academy is an entrance training program designed to provide guidance to the aspiring Medical Graduates who intend to appear for the Entrance examination for Post Graduate courses. MIMS School of Resuscitation under MIMS Academy is an international registered training organization (RTO) of American Heart Association (AHA) for Basic Life Support (BLS), Advanced Cardiac Life Support (ACLS), Pediatric Advanced Life Support (PALS) and Emergency Cardiac Care (ECC) provider courses. The Academy is launching the prestigious international training program in Emergency Medicine (MEM) affiliated to GWU, USA.

The Speciality-World Prospectus

Emergency Medicine (EM) continues to grow internationally in scope and activity and services an essential role as the safety net for patients in many countries. In recent years, urbanization, aging, economic changes and worsening healthcare problems have led to an increased awareness and need for emergency care throughout the world. EM has become more important due to its ability to meet not only the day to day treatment needs, but also to provide planning the

leadership for disaster preparedness. There are now more than 30 countries that have recognized EM as a specialty and many of those countries where it is not yet recognized, are pursuing such specialty recognition and developing residency training programs. Many of the countries that are in the early stages of developing the specialty and their residency programs are reaching out for guidance from those countries that have been successful.

Curriculum Implementation

One of the essential components of an effective academic training program is a solid curriculum plan that provides the faculty and the residents with the specific criteria for theoretical and clinical education. At the international level, The 2003 Model of the Clinical practice of Emergency Medicine: A 2-Year Update can serve as a valuable resource for any country that is implementing an EM training program, and it has already been used to help structure residency programs in multiple countries such as Turkey, Korea, Singapore, Jordan, Saudi Arabia, Poland and Iran. The model has also

been translated into Spanish, and academic institutions in Latin America have been able to use the translated model to integrate EM training programs alongside traditional training programs such as surgery and internal medicine by sharing the translated document with colleagues from other specialties. Specialty societies such as the American College of Emergency Physicians, American Academy of Emergency Medicine, and SAEM could support EM-oriented distance learning projects.

International EM Masters

Masters programs in EM allow EPs to learn a special aspect of the field in more depth or to qualify for a certificate of added qualification (Subspecialty certificate). International EM Masters can offer unique opportunities in both education and research. Specific educational opportunities include international clinical and administrative experiences for EM residents, fellows and faculty.

The American College of Emergency Physicians, American Academy of Emergency Medicine and SAEM potentially could collaborate with the Council of Emergency Medicine Residency Directors, International EM Masters Programs, and other stakeholders to develop standards for international EM fellowship curriculum.

Post-graduate Masters Program in Emergency Medicine (MEM)

The post-graduate masters program in emergency medicine at MIMS will consist of a three year curriculum that will be divided into 36 clinical modules and cover the breadth of emergency medicine. RRIEM and MIMS will provide faculty coverage and program supervision for the masters program. At the successful conclusion of the program, the graduating doctors will be able to practice independently within

Emergency Department as well-trained physicians, and they will receive a 'Certificate of Completion' from the RRIEM at George Washington University-Washington DC, USA. The Course is recognized in more than 30 countries worldwide. The programme is not recognized by IMC. Placement opportunity: The course offers excellent placement opportunity in India and abroad .

Memorable Moments

Admission

1. How to apply

Apply online / email

Training centers (Aster MIMS-Calicut, Aster MIMS-Kottakkal, Aster Medcity-Ernakulam, DM WIMS-Wayanad, Aster CMI-Bangalore)

Website www.emergencymedicinemims.com , www.mimsacademy.org

Registration fee Rs.1500/- in favor of MIMS Academy Trust payable at Calicut.

2. Selection strictly based on merit. Candidates should undergo written and aptitude test. Model question paper can be downloaded from www.emergencymedicinemims.com/downloads

Preferential score will be awarded for

- Performance in under-graduation
- State, National and International CME's attended
- International Life Support courses attended
- Research/Publications
- ED work experiences
- Written test score
- Interview score

3. Preferred books to read for written test

- a. Tintinalli hand book for Emergency Medicine
- b. Oxford hand book for Emergency Medicine
- c. Revision notes MCEM Part A
- d. Secrets of Emergency Medicine

4. All graduated residents were well placed in India and abroad

5. Last date of submission of the application: 20th March 2018, at 5pm

6. Interview on 3rd April Tuesday 2018

Three year Post-graduate Masters in Emergency Medicine (MEM)

Under George Washington University, Washington DC-USA

Course Highlights

- Mastery, Proficiency, Familiarity
- Three-year residency program
- Lectures on the modular topic of the month
- Evidence-based medicine
- Journal article discussions
- Online Log book-Maintained by GWU
- Grand rounds and guest speakers
- Morbidity and Mortality (M&M) conferences
- Follow-up case discussions on patients admitted through the emergency department
- Procedures and skills workshop
- BLS, ACLS, ITLS, PALS, NALS, ATLS Certification
- FAST and Emergency Ultrasound training
- P.O.C. Echo Training
- Rotation in MICU, CICU, NICU, PICU
- Rotation at GWC (RRIEM) Washington
- Research and Publication Faculty Development Program
- Presentation by the Fellows
- Pre-hospital Care Medicine
- Disaster Management
- Attractive Stipend

- MRCEM Training Opportunity
- Vast Hands-on Experience
- Well Experienced Faculty

- Protocol Based Clinical Practice
- Excellent Placement Opportunity

The daily classes will be conducted by GWU faculty and Emergency Faculty from MIMS. After each module an exam will be conducted at the end of the month. fellows will be given a project every month, which they have to finish before the next visit of the GWU faculties. Extra support and coaching will be given to the candidates who are finding it difficult to follow the course modules.

Evaluation

Each module will begin with a pre-test to gauge the fellows' academic knowledge on the clinical topics, and each module will end with a post-test to measure the fellow's level of comprehension and mastery of the material given during the module session. In addition to that, faculty will conduct an annual written and oral exam that covers the 12 modules within that year. The senior members of the Society for Emergency Medicine in India (SEMI) will be invited to participate as examiners. In addition, a final exam covering all 36 modules will be given at the end of the masters program.

How to apply: Duly filled application form should reach MIMS academy office or send scanned copies through mail id: emergencymed.training@asterhospital.com

Aster MIMS Institute Of Emergency Medicine

We at Aster MIMS EM take pride in being the second Emergency Medicine Department in the country to be certified NABH for Emergency Medicine. Presenting India's first super specialty institute for next generation emergency medicine. Encompassing a wide area of general medicine and surgery and other specialties. Aster MIMS institute of Emergency Medicine aims to diagnose and manage patients by applying advanced procedural skills often including surgical procedures, trauma resuscitation, Poly trauma, advanced cardiac life support, Patient Control Analgesia, Point care lab and advanced airway management. Aster MIMS Emergency Medicine came into existence owing to the rising need for acute intervention in all kinds of surgical emergencies across the country, also taking into account the phenomenal rate at which the new specialty has been expanding across the globe.

www.emergencymedicinemims.com

Aster MIMS Calicut

Aster MIMS, a NABH accredited hospital is a 673-bedded multi specialty care center delivering an entire range of preventive, acute and outpatient services. The hospital, located in the heart of city of Kozhikode in Kerala is ideal for people seeking treatment from various ailments, not only because of its superiority in infrastructure but also because of its commitment in operating with the highest standards of safety, cleanliness, integrity and honesty. There is absolutely no substitute for good health, and health of the people is the first priority for Aster MIMS.

With Level IV Trauma Care Centre, Advanced Interventional Radiology, Sophisticated Intensive Care Facilities and the best blood bank in the district. Thanks to its component separation facility feature. Aster MIMS continuously strives to provide the best all-round care. All the care centres in the hospital are fully equipped with the latest technological brilliance aiding in complete and comprehensive treatment of patients.

www.astermims.com

Aster MIMS Kottakkal

Aster MIMS Kottakkal is about 230 Bedded tertiary care hospital inaugurated by great visionary leader, Former President of India (Late) Dr. A. P. J Abdul Kalam , on 15th October 2009. Aster MIMS is the first NABH Accredited hospital in the Malappuram District, Kerala. Aster MIMS Kottakkal is manned with well expired and highly qualified doctors and other paramedical staffs to provide exemplary quality treatment to patients. Aster MIMS Kottakkal is able to diffrentiate ourselves by providing innovative , optimal , evidence based comprehensive care to patients. Aster MIMS is a part of Aster DM Healthcare spearheaded by Padma Shri Dr. Azad Moopen. We lives by our simple promise ' We'll Treat You Well ' .

website: www.mimskottakkal.com

Aster Medcity Kochi

A world-class quaternary care centre with one Multispeciality Hospital and eight separate Centres of Excellence, Aster Medcity combines the best of talent and technology to provide holistic treatment with a multidisciplinary approach. Across the years, Aster Medcity aspires to evolve into a medical destination - one that attracts and nurtures the best talent, keeps upgrading technology as well as fosters research, education and a distinctive work culture that is ethically and socially relevant. Set in a soothingly beautiful 40-acre waterfront campus, Aster Medcity is a 670-bed quaternary care facility with one Multispeciality Hospital and eight separate Centres of Excellence in Cardiac Sciences, Neurosciences, Orthopaedics & Rheumatology, Nephrology & Urology, Oncology, Women's Health, Child & Adolescent Health and Gastroenterology & Hepatology. The first quaternary care hospital in Kerala to achieve the coveted JCI (Joint Commission International) Accreditation - the gold standard in global healthcare, Aster Medcity also won the NABH Accreditation, first-ever NABH Award for Excellence in Nursing and Green OT (Green Operation Theatres) Certification by Bureau Veritas - all within one year of opening its door to the world. One of the most advanced healthcare destinations in India, Aster Medcity offers a comprehensive range of diagnostic and therapeutic technology to facilitate efficient and accurate treatment.

website: www.astermedcity.com

DM WIMS Wayanad

In pursuance of our vision to make DM WIMS a leading academic destination of the country, we shall nurture the students by associating with leading institutions. By adopting a collaborative approach, through various programs, by enlisting the best faculty and visiting scholars from premier institutes across the world, we shall ensure a truly world class education to the young learners here. In addition to the academic infrastructure, DM WIMS has in place long-term strategic plans to constantly monitor and deliver its objectives without dilution of standards. This will ensure that the pursuit of excellence remains constant.

website: www.dmwims.com

Aster CMI Hospital Bangalore

Aster CMI Hospital, Bangalore is DM Healthcare's continuation of its endeavour to create world-class, patient-centric hospitals driven by medical innovations and a culture of excellence. Aster DM Healthcare group, having revamped the existing massive structure, launched a comprehensive super-specialty hospital. The Aster CMI Hospital has contemporary state-of-the-art facilities accommodating close to 500 beds and offers comprehensive primary care to quaternary care services with Centres of Excellence in Cardiac Sciences, Neurosciences, Gastroenterology Sciences, Surgery and Allied Specialties, Integrated Liver Care, Organ Transplant, Urology and Nephrology, Orthopaedics, Women's Health, and Child & Adolescent Health. Everything at Aster CMI is designed keeping in mind the comfort of our patients. The serene environment, spacious interiors and advanced facilities create a positive ambience that is conducive to healing. In a nutshell, Aster CMI stands out from the rest of the peer hospitals on the hospitality front.
